

TAKE CONTROL OF CONDENSATION

Windows dripping condensation, Water pooling on sills, Damp curtains, Black Mould Growth on walls and ceilings, Mildew on clothing etc, Musty smells ... *Welcome to a typical U.K. home in winter.*

The **LOFTY** discreetly banishes condensation from homes.

The system is installed in the roof space of the home and the ceiling located louvre is unobtrusive enough to fit in with the decor of any home.

- **CONTROLS:** Condensation, mildew, mould and dampness
- **HEALTH:** Creates a fresher, cleaner, living environment for you & your family
- **ENERGY EFFICIENT:** Low running costs, better utilisation of existing heating
- **SECURITY:** Ventilates your home without having to open windows
- **SAVINGS:** Gives curtains, carpets and paintwork a longer life
- **SAVES TIME:** Banishes morning windowsill mopping up

PEACE OF MIND

The **LOFTY** is whisper quiet, needs minimal maintenance, has a proven track record and is guaranteed.

The LOFTY is a true ventilation system that uses nature's fresh air to ventilate your entire house.

A ventilation system installed unobtrusively in the roof space of your property, gently introducing fresh filtered air into the home.

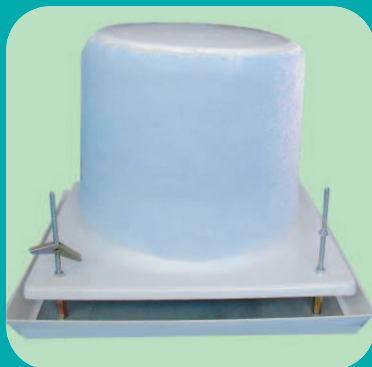

This fresh air replaces the moist, damp air created by everyday living in the home.

Unlike a conventional dehumidifier the **LOFTY** is quiet, requires minimal maintenance, does not require daily emptying and is concealed in the attic.

All you see is a slim unobtrusive louvre, not a large piece of machinery that takes up floor space and has to be moved around.

ALL YOU SEE - LOUVRE

The system ventilates the home from within, thereby eliminating the need to open windows.

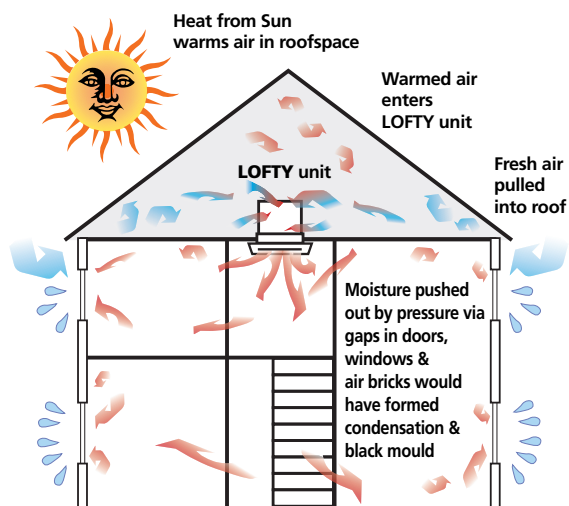

Lofty customers can regulate the level of ventilation required throughout the home via a new air output control dial, which is now conveniently sited on the ceiling located louvre.

These advances allow home owners to choose the desired amount of ventilation required, thereby creating a cleaner, fresher home environment.

The LOFTY

Whole Home Ventilation System

The Most Effective Method of Condensation Control for Domestic Properties

- Easily installed in houses & bungalows
- Energy efficient – low running costs
- User friendly, no water containers to empty
- Whisper quiet in operation
- Low maintenance – filter cleaning usually once a year
- Unobtrusive – only ceiling louvre shows in home
- Provides all-year-round ventilation
- Creates a healthier living atmosphere

In The Home with a **LOFTY** -

The difference is clear
