

# Airfree **destroys** rather than holds viruses

Airfree cannot warrant that all viruses in a room will be destroyed before being inhaled.

Airfree is a complementary precaution to keep a low level of microorganisms in indoor environments. WHO's standard recommendations for individual protection, reducing exposure and cross transmission are to be followed.

## Airfree® advantages

-  Exclusive filterless TSS™ technology
-  Totally silent in filterless TSS™ mode
-  Patented and eco technology
-  Low energy consumption
-  Small and portable
-  Distinctive design
- 2** 2-year warranty

**Airfree®**  
AIR PURIFIERS

Airfree  
certified  
to destroy  
**COVID-19**  
virus

# Scientific test proves that **Airfree ceramic core destroys Coronavirus**

A recent scientific test, performed by MRIGlobal, revealed the efficacy of Airfree's exclusive TSS™ Technology in the process of deactivating Coronavirus.

We can now unequivocally say that Airfree technology will contribute to keep closed environments safer from COVID-19.

## How Airfree **destroys** SARS-CoV-2 (Coronavirus)

The patented heated ceramic core has been tested before in certified labs and proven to destroy all microorganisms, including viruses. Coronavirus, like most viruses, is heat sensitive, therefore, by exposing it to high temperatures, an efficient inactivation is achieved, creating sustainable long-term confidence in our products.

A recent scientific test performed by MRIGlobal, a world leader institution in technology and science, revealed the efficacy of Airfree's exclusive TSS™ Technology in the process of deactivating Coronavirus.

This specific test was performed in only 60 minutes, achieving an impressive virus reduction rate and proving Airfree's efficacy in destroying SARS-CoV-2, the virus that causes Covid-19.

## How the test **was performed**

with Airfree

without Airfree

### 2 identical testing chambers

one with Airfree and one empty (control)

### SARS-CoV-2

nebulized into both chambers with the same amount of viral stock

### Comparative analysis

air-sampling is analysed in both chambers every 15 min for 60 min

### Results

analysis shows an important reduction of live virus in Airfree's chamber when compared to the control chamber

## Check out the **full test**:
