

E Series Fast Test Mode

The Fast Test Mode tests and resets the software on your E Serie unit. This process will reset the filter timer and the gas sensor.

Follow the instructions below to set your unit in Fast Test Mode.

1. Press and hold the POWER button while plugging the power cord into the electrical outlet.
2. Release POWER button.
3. When the display is empty, press the POWER button.
 - The motor will run at high speed
 - After up to 1 minute the REPLACEMENT FILTER LIGHT will light red
4. Press and hold the TIMER key until you hear a beep, then release.
5. Unplug the power cord from the electrical outlet without turning off the unit.
6. Plug the power cord into the electrical outlet again.
 - The unit will now run on full speed for a few minutes to analyze the air quality in the room. Please wait until the unit has finished.

The software has now been tested and reset. Operate the unit as desired and breathe clean air.
